

IE4 + IE8 + NetFront Compatible Demo

[Layout](#) | [Images](#) | [Forms](#) | [Limitations](#)

Table-Based Layout

This entire page is structured with an HTML table instead of CSS floats, flexbox, or grid, since PSP NetFront handles float-based layout unreliably and modern layout modules do not exist in either target browser.

Column A

Two-column layouts here use table cells, not display: flex or floated divs.

Column B

Percentage widths on table cells work consistently across both engines.

Images

Only GIF and JPG are used below. PNG alpha transparency is avoided since it is buggy in IE8 and unreliable in NetFront.

Forms (No JavaScript Required)

The form below submits as a normal full-page request. There is no AJAX, no fetch, and no client-side validation, since early NetFront firmware has no XMLHttpRequest and neither target should be assumed to run JavaScript at all.

Name:

Limitations Followed on This Page

Layout

- Table-based layout only; no floats, flexbox, or grid
- Fixed 460px width to fit the PSP's 480x272 screen
- No CSS2/CSS3 selectors (:nth-child, :not, child/sibling combinators, attribute selectors)
- Standards-mode doctype to avoid IE8 quirks-mode box model bugs

Visual styling

- No border-radius, box-shadow, or gradients
- No rgba()/hsla() colors; hex colors only
- No CSS opacity or IE alpha filter (unsupported by NetFront and IE4)
- No @font-face web fonts; system fonts only
- No CSS transitions or animations
- Font sizes in pt, not px/em, for IE4 reliability

Images

- GIF/JPG only; no PNG alpha transparency
- No SVG

JavaScript

- Zero JavaScript used on this page
- No AJAX/fetch; form uses a standard full-page GET submit

HTML

- HTML 4.01 Transitional doctype
- No HTML5 semantic tags (header, nav, section, etc.)
- No <video>, <audio>, or <canvas>

Full restriction reference: see **restrictions.md**, included alongside this file.

Rendered without CSS2/CSS3, JavaScript, or HTML5 — compatible with Internet Explorer 4, Internet Explorer 8, and PSP NetFront.
